SIM68D reference design

PIN	URAT	URAT Features	Remarks
PIN 20 21	UART0	NMEA	Voltage domain 2.8V
PIN 6 7	UART1	system log	
PIN 18 19	UART2	RTCM NMEA	

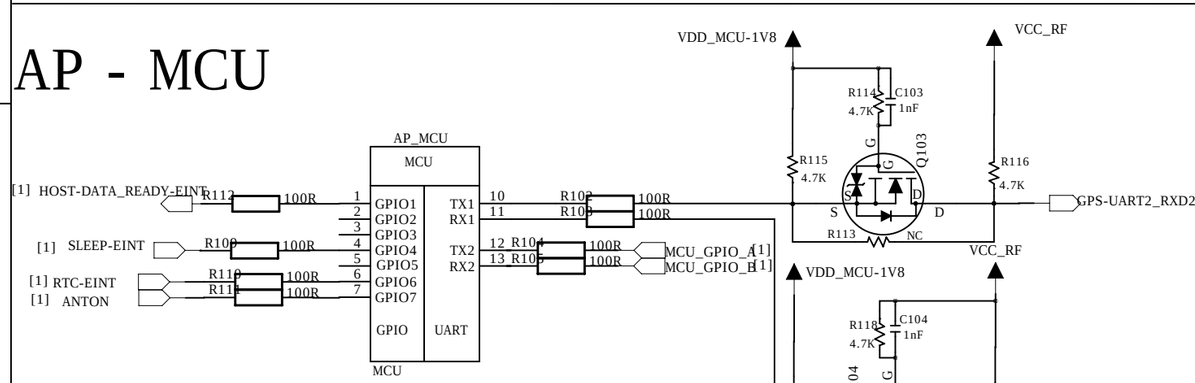

Placed near the module, the capacitance value is small from the avenue

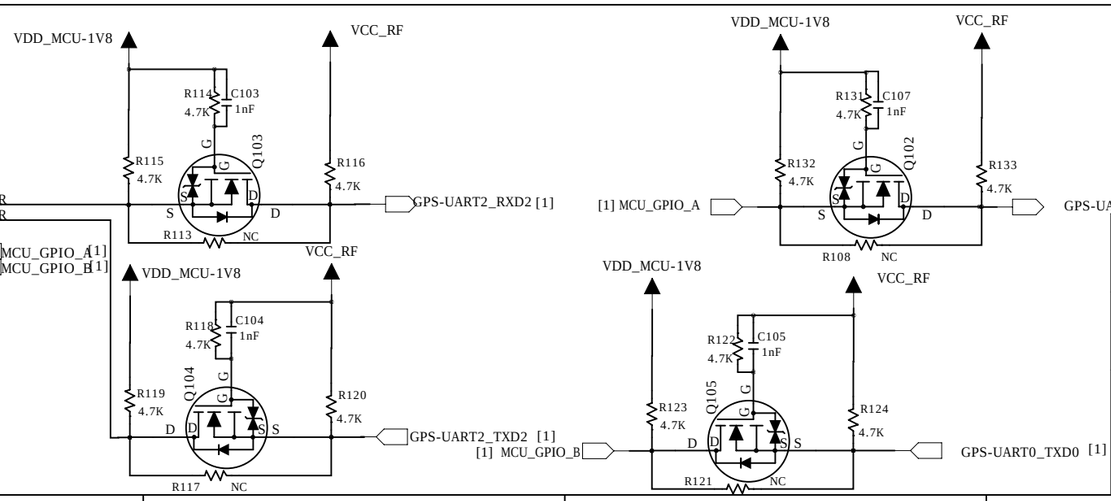

PIN	PIN name	pin Features	Remarks
PIN 4	EINT0	EINT0 pull high 1ms SIM68D exit RTC mode	Voltage domain 1.8V
PIN8	EINT- IN	HOST wake up SIM68D LOW active Edge trigger Deafult internal PULL HIGH	
PIN 17	WAKEUP	SIM68D wake up HOST notify data ready HIGH active LEVEL trigger Deafult internal PULL LOW	

NOTE:SIM68D PIN4 and PIN 8 must be connect,PIN17Recommended connection

AP - MCU

NOTE:AP- MCU The interface voltage domain is 1.8V to design
